

Insurance Network Transition

Due to unforeseen circumstances as of August 1st 2022 we will be **temporarily out of network** for most commercial insurance plans. Medicare and Medicaid will not be affected. As a result;

1. Our practice remains open to patients with all types of plans that allow choice of provider (PPOs), in addition to patients who choose to receive care outside of their plan (HMOs). We certainly hope to continue to provide care for all of our patients and will continue to file your insurance claims.
2. We are reducing our fees in an effort to make it possible for most patients to continue with us through this transition time period by contacting Patient Accounts- Lindsey 470-407-3339
3. We will reschedule some elective patient appointments and testing until we are back in network.
4. Our team will as always remain available to you by phone, E-mail and the patient portal to answer any questions or concerns.

Our website www.heartdrsingh.com will also keep updating as we get back into network.

SELF PAY OPTIONS – With many patients having high deductible plans our self-pay option is often a reasonable alternative to having the test paid through insurance. We have *some of the lowest self-pay rates for testing* and these rates can be found on our website.

Self-pay requires payment in full on the day of the test. There is usually no delay in testing since no insurance authorization is needed. Multiple tests can be done on the same day and often can be reviewed the same day!

Exciting New Trials Coming Soon!

NSC Research continues its leadership role of bringing the latest new therapeutic options to our community. As we wind down some major clinical trials, new ones are about to begin enrollment. They will cover keys areas such as new blood thinners for atrial fibrillation, new therapies for heart failure, new ways to tackle inflammation in the heart and new approaches to managing lipid disorders. We are fortunate to have two outstanding research coordinators **Marisol Ramos** MBA, CRC and **Juli Zabala** MA, CRC who ensure that your participation will be an enjoyable, safe and exceptionally professional clinical trial experience!
