

Revamped Website!

We are excited to have you visit our revamped website. All of Dr Singh's comprehensive set of articles are grouped into 4 sections on the front page.

Heart Conditions and Symptoms, Comprehensive Heart Testing, Diet and Lifestyle and Heart Medications.

In addition, the site offers office location directions, contact information, staff profiles, appointment bookings, research program updates and the ability to download forms that can save you time by filling in advance.

Dr Singh's latest article emphasizes the need to get fully vaccinated against COVID-19 . We are seeing some vaccine hesitancy which will sadly delay normalization of life and bring unnecessary harm to many others.

We warmly welcome **Marisol Ramos** to the NSC Research program as a research coordinator. Along with **Juli Zabala** we are currently enrolling in a number of exciting trials that hope to advance the field of cardiology and offer our patients early access to these breakthrough therapies!

A reminder that through the **patient portal** you are able to review some of your test results and office notes. You can also make prescription and appointment requests. If your access has not been **activated** please contact our front desk for an **invitation E-mail**.

**Good-Bye to the Donut Hole?
....not quite but somewhat
better !**

As all Medicare patients know drug costs can be very expensive. Changes this year are designed to eliminate the donut hole. After meeting the annual \$445 deductible you will have to pay a drug copay up to \$4130. That's when the "donut hole" would normally kick in but as of this year, your cost will only be 25% of the drug cost until you reach \$6550 at which point your cost would drop to 5% of drug cost.
