

## HEART PROTECTION PREVENTION PROGRAM – Lecture Series Begins

The first of our free lecture series will be presented on Saturday May 20<sup>th</sup> at 11am in our Johns Creek office by Dr Singh entitled “**Do’s and Don’t’s- Drugs in Cardiology**” This informal event also is a great opportunity to have general questions answered.

Preventing heart attacks, strokes and loss of limbs is a major focus of what we do. Identifying risk early allows one to make the necessary changes. Please help someone you know who is concerned about their heart health by considering this package which includes a **stress test, vascular imaging, rhythm analysis, coronary calcium score, blood tests, along with a 10 year and lifetime risk score**. No insurance is needed for this \$750 package that can be paid in up to 3 installments. Results are reviewed with Dr Singh and Taylor Mabe. *This program is not recommended for individuals having symptoms which can be addressed promptly by our office team.* To book your screening visit please call the office at 678-208-0165 or email [Lindsey@nsccardiology.com](mailto:Lindsey@nsccardiology.com)

Our billing company has changed. For all billing inquiries, we have a new number **470-820-7733**.

**Copays, deductibles, payment plans** – it’s that time of the year again when deductibles reset and insurance cards need to be reverified. Please be prepared for your office visit. We will try and notify you in advance of the expected deductible but often the insurance companies are slow in providing the information. If our estimate is incorrect our billing office will work quickly to refund any excess amount. In general, we don’t have a payment plan option but can offer a 50%-25%-25% 3 month plan if needed.

## Congratulations to our Medical Assistants (MA’s)

We have had another successful year with our MA’s. Both **Shreya Mahadevan** and **Luvika Gupta** have matched into Internal Medicine residency positions. **Shreya Sunil** has been accepted into the 7 yr medical school program at MCG. We will greatly miss these highly talented individuals but wish them well in their future careers. We continue to seek highly motivated students who want to gain clinical experience in our clinic. To apply a minimum commitment of 6 months is required. Contact [Vanessa@nsccardiology.com](mailto:Vanessa@nsccardiology.com)

## Research Breakthroughs Reported with NSC Research Trials

We participated in the CLEAR study. These exciting results presented last month showed that bempadoic acid (Nexletol) reduced cardiovascular deaths, heart attacks and strokes by 15%, offering a welcome alternative for patients who cannot take a statin. **NSC Research** is a leader in clinical trials and currently we are conducting studies looking at new therapies in **heart failure, lipid lowering agents, weight loss drugs and new blood thinners for atrial fibrillation**. We welcome your participation in these trials even if you are not a patient here!
