

NEW RESEARCH STUDIES- Are you eligible?

RESEARCH STUDIES-We are excited to be starting multiple new trials aimed at preventing heart failure in diabetics, reducing cardiac events with a twice per year injection therapy to treat hypertension, reducing strokes with an injectable blood thinner which may have less bleeding than our current options and reducing cardiac events by lowering a bad lipid protein called LP(a) in individuals at high risk. For all our enrolling trials please visit our website or reach out to our study coordinators if you or someone you know is interested. NO insurance is required, you are compensated for your travel, and you DO NOT need to be a patient in our practice to participate.

NO SHOW FEES – We pride ourselves on seeing patients promptly but to accommodate everyone in a timely manner we cannot have no show patients. Please note that if you have **confirmed** your appointment or testing and fail to show up on time we will need to charge a \$50 fee. For nuclear stress testing the fee is \$400 to cover the radioactive tracer that will have to be discarded. Please avoid these charges by rescheduling at least 24 hours in advance.

HEART PROTECTION- consider the gift of life by offering **someone you love** this prevention package. Identifying risk early allows one to make the necessary changes. The package includes a stress test, vascular imaging, rhythm analysis, coronary calcium score, blood tests, along with a 10 year and lifetime risk score. **No insurance is needed for this \$900 package that can be paid in up to 3 installments.** Results are reviewed with Dr Singh. *This program is not recommended for individuals having symptoms which can be addressed promptly by our office team.* To book your screening visit please call the office at 678-208-0165.

Welcoming Olivia Basile PA-C

We are very pleased to welcome Olivia Basile to our practice. She graduated from High Point University in North Carolina with her Masters in PA studies. She has practiced in a busy Primary Care practice in Mount Airy, NC for the past two years and now has relocated with her husband to Cumming Georgia.

Olivia is passionate about preventive care and will work alongside Dr Singh at both the Cumming and Johns Creek locations. She also speaks Spanish which will enhance our service to the Hispanic community!
